

THE POLICY OF THE COMPANY DOPRASTAV, a. s.

The top management of the company Doprastav, a.s. is aware of, and recognizes its responsibility in the field of implementation of principles of the quality management, the environmental management and the safety and protection of health at work management systems. Striving to provide for the effectiveness of their functioning and continuous improvement, the top management adopts the following principles:

- to sustain and to improve the production quality so that the needs of our clients, both on the domestic as well as foreign markets, would be satisfied to the maximum possible extent,
- to abide the legal and other requirements related to the company's activities in the area of the quality management, the environmental management and the safety and protection of health at work management systems,
- to produce and to provide sufficient financial resources in order to secure continuous improvement, attainment of company's vision and strategy, implementation of management systems objectives and increasing the employees contentment,
- to provide for the education and training of personnel, so as to ensure the staff members to be competent to perform the assigned activities while observing the requirements of the quality management, the environmental management and the safety and protection of health at work management systems,
- to invigorate the awareness of employees with regard to their coresponsibility in protecting their health, as well as the safety of other persons entering the premises of the company's sites and work places,
- to give continued attention to saving the natural resources, recycling of waste and preventive environmental protection,
- to implement and to develop the risk management.

The company's management and its employees undertake to abide, in mutual cooperation, the above stated principles.

Bratislava, June 1, 2010
